

## **CEDIE S.A., new Associate Member to the Tabira Foundry Institute**

***The company CEDIE 2018 S.A. becomes a new Associate Member of the Tabira Foundry Institute. This company, whose mission is to cover the needs of the metallurgical sector in the field of ferroalloys and encapsulation and additive technology, thus supports and becomes part of this working network around technical and technological knowledge in metalcasting industry.***

The Tabira Foundry Institute is a meeting point for the development and exchange of knowledge within the foundry industry, in order to meet and give a proper response to the concerns, needs, and challenges in this sector, paying special attention to its Associate Members.

It is an inclusive technical initiative, in which companies belonging to the different key groups in Foundry have been involved since its creation: foundries; suppliers of raw materials, consumables and equipment; consumers and designers of cast components; along with technological and academic centers, as well as professionals whose activity is developed in processes related to Foundry.

The incorporation of the company CEDIE 2018 S.A. to the Tabira Foundry Institute will allow increasing the scope of the relationship framework between casting producers and suppliers around the development of technological advances, as well as taking advantage of new opportunities for accessing to international knowledge and expertise for the entire network.

### **About CEDIE**

CEDIE is an expert company in the production of encapsulated wire for applications in metallurgy, the supply of high-quality ferroalloys and the study and supply of the necessary equipment for the implementation of encapsulation technology.

In the words of its Quality Manager, José Manuel Corcoba:

*“The company conducts constant studies in order to keep innovating and growing each day towards a better future. We work closely with our clients to get to know better their needs and objectives. We listen, advise and inform them for achieving the most accurate solution adjusted to each case”.*
