

## **SPECTRO HISPANIA S.L., new Associate Member to the Tabira Foundry Institute**

***Coinciding with the international 40<sup>th</sup> anniversary of the company, SPECTRO HISPANIA S.L. becomes a new Associate Member of the Tabira Foundry Institute. This leading supplier of analytical instruments thus supports and becomes part of this working network around technical and technological knowledge in metalcasting industry.***

The Tabira Foundry Institute is a meeting point for the development and exchange of knowledge within the foundry industry, in order to meet and give a proper response to the concerns, needs, and challenges in this sector, paying special attention to its Associate Members.

It is an inclusive technical initiative, in which companies belonging to the different key groups in Foundry have been involved since its creation: foundries; suppliers of raw materials, consumables and equipment; consumers and designers of cast components; along with technological and academic centers, as well as professionals whose activity is developed in processes related to Foundry.

The incorporation of the company Spectro Hispania S.L. to the Tabira Foundry Institute will allow increasing the scope of the relationship framework between casting producers and suppliers around the development of technological advances, as well as taking advantage of new opportunities for accessing to international knowledge and expertise for the entire network.

### **About SPECTRO HISPANIA S.L.**

analytical equipment, reference material, sample preparation machinery and fully automated systems for elementary chemical analysis.

Since 1979, SPECTRO HISPANIA S.L. distributes spectrometers and analytical equipment destined to laboratories and control stations in the industry, research and academia. The company also covers those industries that require specific

In the words of its Commercial Director, Guillermo Lecumberri:

*“We celebrate this year in Spectro not only 40 years manufacturing spectrometers for metal analysis, but also our incorporation as partners of the Tabira Foundry Institute. Our objective is the exchange of analytical knowledge in the Foundry sector, as well as offering training at the highest levels of the technique. We are available for the Tabira Foundry Institute and its partners, desiring also to celebrate in the future many years of collaboration”.*
