

ACOMET METALES Y MINERALES S.L., new Associate Member to the Tabira Foundry Institute

The company ACOMET METALES Y MINERALES S.L. becomes a new Associate Member of the Tabira Foundry Institute. This company, whose mission is the supply of raw materials for different types of industries, mainly for Iron and Steel Casting, as well as for the surface treatment sector, thus supports and becomes part of this working network around technical and technological knowledge in metalcasting industry.

The Tabira Foundry Institute is a meeting point for the development and exchange of knowledge within the foundry industry, in order to meet and give a proper response to the concerns, needs, and challenges in this sector, paying special attention to its Associate Members.

It is an inclusive technical initiative, in which companies belonging to the different key groups in Foundry have been involved since its creation: foundries; suppliers of raw materials, consumables and equipment; consumers and designers of cast components; along with technological and academic centers, as well as professionals whose activity is developed in processes related to Foundry.

The incorporation of the company ACOMET METALES Y MINERALES S.L. to the Tabira Foundry Institute will allow increasing the scope of the relationship framework between casting producers and suppliers around the development of technological advances, as well as taking advantage of new opportunities for accessing to international knowledge and expertise for the entire network.

About ACOMET METALES Y MINERALES S.L.

The activity of the company ACOMET METALES Y MINERALES S.L. is focused on the supply of raw materials for different types of industries, mainly for Iron and Steel Casting, as well as for the surface treatment sector.

Its main products for Foundry are:

- Chromite sand.
- Standard Ferrous: FeSi, FeMn, SiMn.
- Noble Ferrous: FeMo, FeNb, FeTi, FeV...
- Metals: Ni, Mn, Cr, Sb.
- Recarburizers.
- Abrasives: Carbon steel and stainless steel blasting, Glass microspheres.

The commitment to knowledge and international networking are two of the company's values. Its multiple synergies with world-class suppliers, mainly in Europe and for many years, allows the company a deep knowledge of the European market for ferroalloys and consumables.

On the company's new membership to the network of the Tabira Foundry Institute, and in the words of its Director, Patxi Ruiz, *"we believe that we can bring great value and many ideas to the partners of the Tabira Foundry Institute on the reality of the sector and in trends for products and processes, both in the field of metalcasting and surface treatment."*

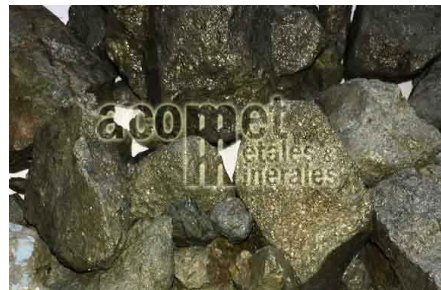

As for the new challenges of the sector, the Head of the Metallurgy Division, Xabier Ria, says that *"we are always immersed in a continuous learning process and facing new challenges in the new scenarios that arise in a global market. Our workforce has grown in parallel to digital development, bringing naturally to learning the set of digital processes that take place in the company within the framework of Industry 4.0."*
