

BETSAIDE S.A.L., new Associate Member to the Tabira Foundry Institute

The company BETSAIDE S.A.L. becomes a new Associate Member of the Tabira Foundry Institute. This company, specialized in the production of spheroidal graphite cast iron for strategic industries like Automotive, Industrial and Agricultural Vehicles or Valves, thus supports and becomes part of this working network around technical and technological knowledge in metalcasting industry.

The Tabira Foundry Institute is a meeting point for the development and exchange of knowledge within the foundry industry, in order to meet and give a proper response to the concerns, needs, and challenges in this sector, paying special attention to its Associate Members.

It is an inclusive technical initiative, in which companies belonging to the different key groups in Foundry have been involved since its creation: foundries; suppliers of raw materials, consumables and equipment; consumers and designers of cast components; along with technological and academic centers, as well as professionals whose activity is developed in processes related to Foundry.

The incorporation of the company BETSAIDE S.A.L. to the Tabira Foundry Institute will allow increasing the scope of the relationship framework between casting producers and suppliers around the development of technological advances, as well as taking advantage of new opportunities for accessing to international knowledge and expertise for the entire network.

About BETSAIDE S.A.L.

front-line European OEMs), Agricultural vehicles and machinery (both OEMs and their Tier 1 suppliers) or Valves / Hydraulics, among others.

The activity of the company BETSAIDE S.A.L. is focused on the production of spheroidal graphite cast iron and austempered ductile iron (ADI), in a weight range from 150g to 20Kg and supplying both rough-cast and finished components. Its production is aimed at strategic sectors such as Automotive (Tier 1 suppliers, top-level manufacturers and global benchmark companies, mainly at their European production plants), Industrial Vehicle / Truck (directly to several

In the words of Asier Ayo, the CEO of the company: *“Our commitment to partnering the TABIRA Foundry Institute involves the idea of actively cooperating in the development of technical knowledge within our activity, accepting as a value proposition the presence and contacts of this organization at the international foundry framework.”*

Regarding the entry of BETSAIDE to the collective of companies associated to the TABIRA Foundry Institute, and in the words of its General Secretary, José Javier González: *“BETSAIDE's values of cooperation with the industry and commitment with technical and knowledge advances make this entry to the Association a really smooth and natural process.”*

“We are strongly used to count with this company present both in our technical proposals and in the international frameworks offered in the industry indeed. Now, with their incorporation as member partners, we will be able to offer BETSAIDE some proposals that are exclusive for the foundries that are part of the organization,” says the Secretary of the Association.
